Date: 11/8/2012

Superintendent: Jimmy May

Company: Brazos M&E

Huntsman Storm Water Sump Project

Brazos M&E has been working to complete the project at the Huntsman, Freeport facility. The smallest sump measuring 30'x25'x15' and the larger 75'x72'x18' creating large excavations and confined spaces and have compiled zero incidents and zero accidents since their start in August of 2012. There have been some challenges along the way, but most importantly safety has not been compromised. On behalf of Brazos M&E, thanks for working safe!

Cleve McGaughey – Field Safety Director
