

The Infinity Group Management Recognition Program

Date: 3/7/2013

Employee Name(s): Spencer Harris, Rudy Silvas

Superintendent: Ronald Dudley

Company: United Electrical & Instrumentation

I would like to commend the Spencer Harris and Rudy Silvas from the Crane and Elevator Department for a job well done. During our Jan/Feb shutdown they installed four 10-ton air tuggers to pull out S-152 seals and rotor to replace with a new one. When we began the job we started having issues with two of the tuggers. They installed a dryer thinking the air was too moist. We then had issues with the hoist turning on and not stopping. The techs worked diligently to try and fix the problems many times with a great attitude the entire time. I think they were called in three nights in a row to help us. They responded quickly every time and fixed the problem to get us through the night and keep the job moving forward. We finally had procure two new hoists and have them installed, and they worked great. I would like to say thank you to SPENCER HARRIS and RUDY SILVAS for there help throughout the entire ordeal to keep this CRITICAL PATH job going. We ended up finishing the job ahead of schedule! Without their help and support along the way this could not have been achieved. Thanks to RON DUDLEY for answering our many calls every time and again a BIG THANKS goes out to SPENCER and RUDY for your great attitude, good communication and skills to fix the problem each and every time we called.

Tim Sparkman – The Dow Chemical Company, Freeport
